FOUNDER'S DESK

I have always believed that successful businesses are built on strong relationships, operational excellence, and a commitment to quality. Throughout my journey, my focus has been on building efficient teams, streamlining processes, and ensuring every client receives exceptional service.

As Founder of Opulence Media, I have played a key role in strengthening operations, client engagement, and project execution. Together with our team, we have delivered premium signage and branding solutions for leading real estate developers, corporates, retail brands, hospitals, and educational institutions across India.

I believe in leading with transparency, integrity, and collaboration while empowering people to grow. Our vision is to be more than a signage company—we strive to be a trusted partner that helps businesses create impactful spaces through innovation, precision, and dependable service.

- MRS. ANEESA NAIK

B. E

In 2013 with a vision, dedication and a growing team from 2 to 40 qualified and talented employees, we expanded our workshop for in-house production of signages.

With working for clients like **Hiranandani Group** , **Tata Housing Development** , **Shapoorji Pallonji Group** and others to name a few, we moved on to designing the same signages in 2018-2019 which once upon a time we used to out-source, along with that we started the installation of **LED Signs**, Digital signages & Video walls among other things.

By collecting directional cues from the world's top brands and working closely with my team, I grasped the immense knowledge generated by putting employees ahead of profits through shared values like integrity, freedom, leader ship, and collaboration to forge a sustainable future.

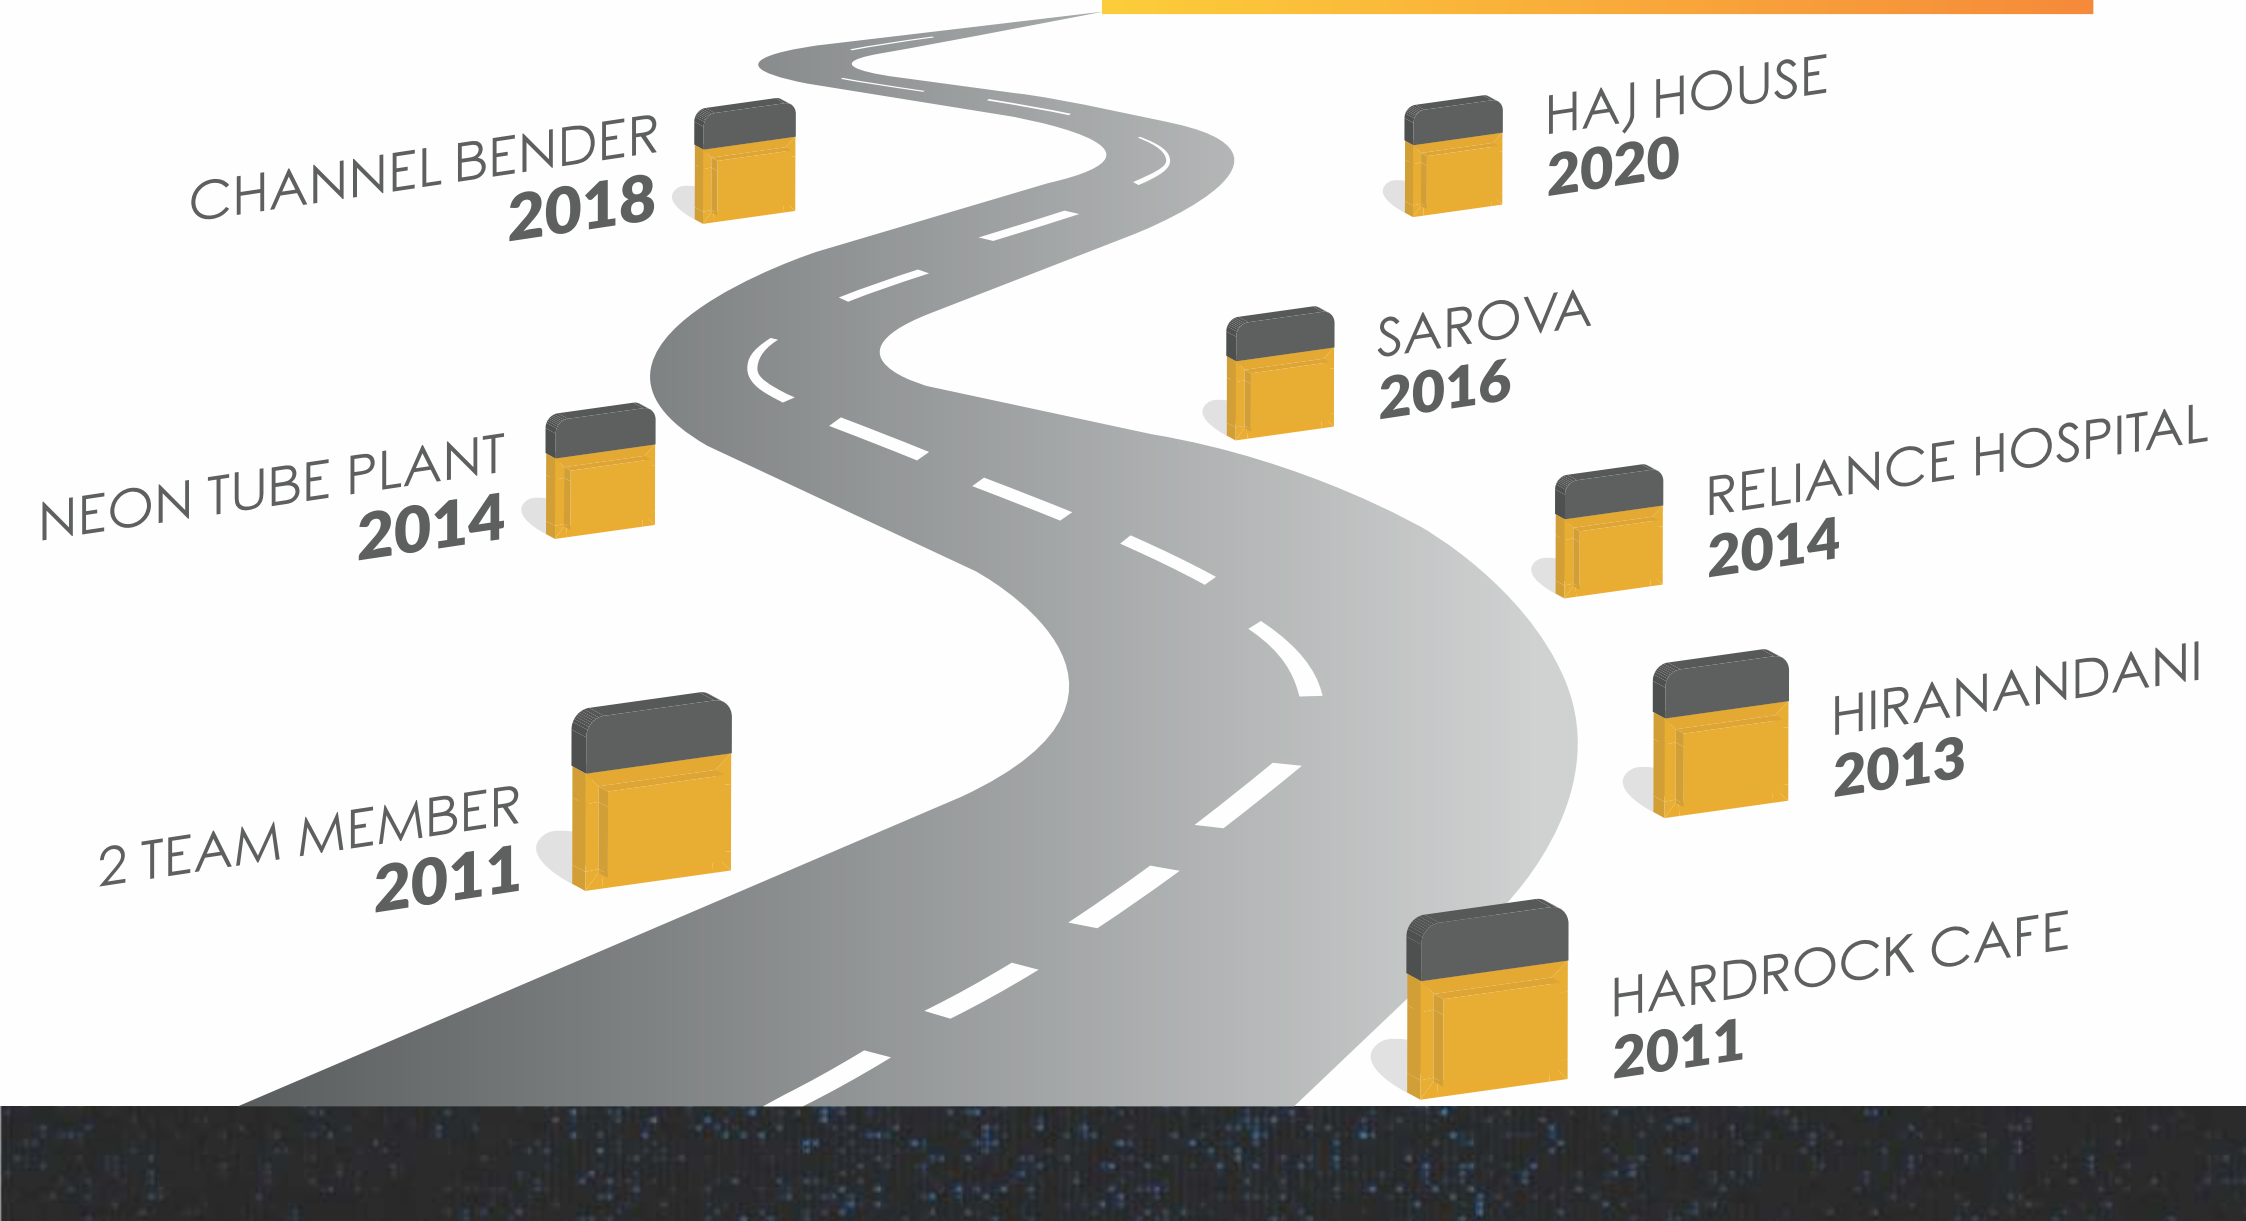

Through our work culture and ethics, we drill into the team's mind about transparency, honesty and integrity. There fore, we are known to the world not just as a signage making company but a service provider because good service always leads to repeated business.

Together with my innovative partners and talented team, we are all set to showcase the energetic spirit of our skillful ness under the label of Altusign, with the intent to increase the productivity of business spaces, our latest **Furniture and optical display venture** has launched to liven up spaces with never-ending possibilities."
